

Installation of Ground Gas Protection Measures

The training event is intensive and interactive and focuses on best practice based on National Occupational Standards and the latest CIRIA C735 guidance on installation and verification of gas protection measures.

WHO SHOULD ATTEND THE TRAINING EVENT?

The training event is designed specifically to provide **on-site personnel** with the knowledge and requirements of good membrane installation and an understanding of the verification process to achieve a fit for purpose product.

HOW LONG IS THE TRAINING EVENT?

The training event is for 1 full day.

Meet your Trainer

Neil Salvidge
PAGeotechnical Training Manager and NVQ Assessor

Neil has an extensive and comprehensive knowledge of the construction industry. Having qualified as carpenter in the 1980s, he worked nationally and internationally for many multidiscipline contractors.

Neil's experience in project management, site procedures and developing installation methods enabled him to be at the forefront of developing methods for gas membrane installation which had become a new feature on construction projects in the 1990s.

Neil became the first Gas Membrane Assessor in the UK, of which there are currently only three.

As an educationalist, Neil delivers a variety of training events nationally and internationally and has been integral in the development of the Gas Membrane NVQ, the Gas Membrane Installation Specialist Up-skilling Programme and the Validation Protocol for technicians.
